The wpd Group

Some 4,300 employees worldwide

Today, the wpd group employs some 4,300 staff who are driving the expansion of wind and solar energy around the world and who offer a complete value-added chain in this field.

The company's head office has been located in Bremen since wpd was set up in 1996.

*wpd employees from
our office in Potsdam*

The turbines installed by us in **Germany** can supply about
2,800,000 households with power.

A major success *in more than two decades*

In 1996 the two founders stood alone – today 1,200 employees at wpd GmbH work in the wind energy division. Of these, around 720 work in the German market and 480 in international markets – and we are currently developing onshore projects primarily in Europe but also in America and Asia.

All these employees represent a total of about 2,810 wind turbines so far with a total worldwide installed power of around 6,900 megawatts. Ahead of them lie projects amounting to a further 31,585 megawatts – a challenge that all those involved approach with high motivation and the conviction that they will master it just as successfully as the others before.

The individual teams, sometimes working with partners, take reliable care of all phases of the projects – from the first evaluations of the location, wind measurements, the approvals process, finance, turbine purchase through to the construction and sustainable operation of the wind farm.
