Bremen, December 7th 2021

wpd signs supply contract with Nordex for Swedish onshore project

wpd has signed an agreement with Nordex Group for the supply of wind turbines for the onshore project Stölsäterberget in Sweden. For the 47 MW project owned by wpd europe, Nordex will supply eight N163/5.X turbines and will provide premium service for the turbines over the period of 15 years, with an extension option for a further five years.

With the Stölsäterberget project, wpd is further expanding its position on the Swedish market, after the Aldermyrberget project (17 WTGs, 71.4 MW) in northern Sweden was last commissioned in 2020. With its Swedish national subsidiary wpd Scandinavia AB, the company will develop and connect to the grid a number of further projects in central and northern Sweden in the coming years.

The project site is located on the border between the two regions of Dalarnas Län and Värmland. Preparatory construction works on the wind farm access roads have begun in October 2021. The turbines are scheduled to be installed in mid-2023. These will be supplied in the cold-climate variant with an anti-icing system for the rotor blades, enabling operation even at temperatures as low as -30° C and thus high annual energy production can be expected due to less downtimes.

"With our Stölsäterberget project, we are extending the good cooperation between wpd and Nordex," says Johanna Bohn, Country Manager for Sweden at wpd. "Our entire Swedish team is very pleased that we can now implement our first joint project with Nordex in Sweden and thus together make another important contribution to achieving the national climate targets," adds Maria Röske, Managing Director at wpd Scandinavia AB.

"We are delighted with what is already the third order from wpd for N163/5.X turbines in the Nordic countries and the trust placed in us once again," says Patxi Landa, CSO Sales and Marketing at Nordex Group. "With the Stölsäterberget project, we are jointly continuing in Sweden what we started with the agreement on turbine deliveries for the Finnish wpd projects Karhunnevangas and Nuolivaara scheduled for 2022."

The green electricity generated is marketed with a "pay-as-produced" PPA, which has been concluded with the international technology company Microsoft. With Stölsäterberget, wpd is implementing another important contribution to decarbonization in Northern Europe.

About wpd

wpd AG develops and operates onshore and offshore wind farms and solar parks, and is actively engaged in 28 countries around the world; the head office is in Bremen. The German company has already realized wind energy projects with around 2,400 wind turbines and an output of 5,150 MW, and is planning further projects with a total of 12,300 MW onshore, 13,800 MW offshore and 1,650 MWp solar energy.

About the Nordex Group

The Group has installed more than 37 GW of wind energy capacity in over 40 markets and in 2020 generated revenues of EUR 4.6 billion. The company currently employs a workforce of approx. 8,500. The joint manufacturing capacity includes factories in Germany, Spain, Brazil, the United States, India and Mexico. The product portfolio is focused on onshore turbines in the 4 to 6.X MW class, which are tailor-made for the market requirements of countries with limited space and regions with limited grid capacity.
